Virú, November 4, 2026

NGE, through its subsidiary Saceem, to finance and deliver a €23 million school project

- *A €23 million investment (89 million Peruvian soles) to rebuild the Virú school.*
- More than 16,000 m² of modern educational facilities to sustainably improve teaching and learning conditions.

NGE announces that its subsidiary Saceem has been awarded the contract to finance and deliver the reconstruction of the Virú school in Peru. Led by the Regional Government of La Libertad, this €23 million (89 million Peruvian soles) project includes the construction and equipping of a new school. Implemented under Peru's "Obras por Impuestos" (OxI) program, it strengthens NGE's presence in Latin America and demonstrates its commitment to developing infrastructure that delivers significant social benefits.

The project, carried out by NGE through its subsidiary Saceem, includes:

- The construction of more than 16,000 m² of educational facilities across several buildings accommodating three levels of education: preschool, primary, and secondary;
- The construction of classrooms, laboratories, workshops, administrative facilities, and multisport areas;
- The supply and installation of school furniture and modern technological equipment;
- The provision of temporary facilities to ensure the continuity of education throughout the construction period.

The project will be delivered under Peru's "Obras por Impuestos" (OxI) program, which enables public and private stakeholders to jointly finance and deliver infrastructure projects that serve the public interest.

Once completed, the new school will benefit more than 32,000 people, including students, teachers, and members of the local community. It will contribute to sustainably improving teaching and learning conditions while supporting the educational and social development of the province of Virú.

About Saceem

Saceem is the leading construction company in Uruguay, with more than 75 years of experience. The company stands out for its multidisciplinary approach, with expertise in infrastructure, energy, water, telecommunications and architecture, as well as its ability to deliver large-scale projects. Its subsidiary Grinor, specialized in road infrastructure, is a benchmark in base layers and pavements for urban projects in its sector. Through its Concessions division, Saceem actively participates in public-private partnership (PPP) projects in the road, education and railway sectors, including PPP Ruta 21 and 24, PPP

Educativas II, and PPP Ferrocarril Central. Also present in Peru and Paraguay, Saceem employs more than 1,800 people.

About NGE

NGE – Nouvelles Générations d'Entrepreneurs, the fourth-largest construction group in France, delivers both large-scale infrastructure projects and local urban developments. Thanks to its expertise in financing, design, construction and maintenance, the Group has established itself as a key player in delivering infrastructure that addresses the economic and environmental challenges faced by communities. Its entrepreneurial dynamic is supported by strong employee shareholding (founders, executives and employees hold 72% of the Group's capital), complemented by the French investment fund Montefiore (28%). With €5 billion in revenue, NGE operates in around twenty countries, supporting public and private clients in the financing, design and delivery of projects related to water, mobility, urban regeneration, energy and telecommunications. The Group's 26,000 employees are proud to contribute to building infrastructure that transforms the world.
