

## Press release

15th March, 2023.

### **15 months after the opening of its German subsidiary, NGE awarded a 3<sup>rd</sup> contract**

**Yesterday, NGE, top 4 French player in the construction industry and expert in telecommunications, inaugurated its second fibre optic network construction project in the Frankfurt region with a traditional *First dig* event in the city of Ranstadt.**

Awarded by HessenKom, a German internet and network specialist, the contract includes the design and construction of the fibre optic networks in the region of Hesse. As part of this framework contract, the five cities of Bellmuth, Bobenhausen, Dauernheim, Ober-Mockstadt and Ranstadt will be the first to be equipped with a fibre optic network. To deliver the 2,000 home connections included in the contract, NGE will carry out 33km of civil engineering works to install the new fibre optic network underground.

Another success for the company, which is asserting its implantation in the South West of Germany after establishing offices near Karlsruhe in 2021 and signing two framework contracts with main operators Deutsche GigaNetz and Breitband Main-Kinzig in 2022. This new contract improves the order book visibility and recurrence of NGE's German subsidiary.

Work began in February in the city of Ranstadt.

This project is an active contribution to Germany's objective to connect more than 26 million homes to fibre by 2026.

The NGE Group has delivered 1.8 million home connections around the world.

**About NGE (New Generations of Entrepreneurs)**

**NGE** is an independent construction and civil engineering company, with revenues of 2.8 billion euros: one of the top 4 players in France. Around the world, **NGE** teams finance, design, build and renew infrastructures and buildings in 17 countries. The Group's 16,000 employees are involved in the construction of major energy, sustainable mobility, and telecommunications networks infrastructures, with a proven track record worldwide.
