

PRESS RELEASE

24 November 2017

PARIS - NGE rail subsidiary TSO signs a contract with RATP to extend Line 11 of the Paris Metro

The consortium led by NGE via its rail subsidiary TSO signed a contract with RATP on Friday 24 November 2017 covering the design and construction of the Paris Metro Line 11 extension and a new maintenance centre. This €32 million project is part of the Grand Paris infrastructure programme to extend and expand the public transport network to the east of Paris. The new extension will link Mairie des Lilas station to Rosny Sous-Bois station when it comes into service in 2022.

NGE's rail subsidiary will lay the 12.4 km of metro tracks, the guidance system in its entirety, as well as the 'conventional' track used exclusively for train maintenance and the walkways on either side of the tunnel.

TSO was able to rely on its proven expertise in rail infrastructures to show RATP its ability to adapt to the transport operator's new needs, and provide the project assistance required to manage this complex urban worksite, which forms an integral part of the Grand Paris Express project.

ABOUT TSO: Building on 95 years of experience in France and internationally, TSO puts its expertise to work on rail infrastructures and systems (rail network construction, replacement and maintenance, electrification and catenary upgrading, topography and rail software development, rail safety, etc.). In its commitment to innovation, TSO focuses its research on delivering improvements that combine quality with service efficiency and personnel safety. The development of synergies between TSO specialist sectors and the complementary disciplines of NGE allows the Group to offer a comprehensive package of products and services to its markets.
